

I am the proud owner of XM Satellite Radio. I made the decision to purchase XM radio for several reasons: (1) the ability to receive a signal in the mountainous region where I am from. I have purchased signal boosters to boost the antenna for my home stereo, but to no avail. (2) the price was right. (3) the convenience of being able to switch to any genre of music I am in the mood for, to get up to the minute traffic and news information is value for me. (4) the commercial free music.

I ask that the FCC reject the NAB's petition 04-160 and continue supporting XM Radio.

Oh please don't take my XM away from me...

Chris Steiner
